DETAILED ACTION

*** This office action is in response to Applicant's Pre-amendment and formal drawings filed on January 02, 2002. Claims 1-89 are pending.

*** In the specification, information of related applications should be updated to include Patent No. 6,336,974 for Application Serial No. 09,183,233, and Patent No. 6,336,973 for Application Serial No. 08/906,578.

Claim Rejections - 35 USC § 112

1. Claims 16,30,72 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Re claim 16, nowhere in the specification describe and support for "...moving wave of said viscous material traveling across..."

Re claims 30 and 72, nowhere in the specification describe and support for "ultrasonic transmitter...ultrasonic sound wave...".

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

2. Claims 1-89 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-30 of U.S. Patent No. 6,040,205. Although

Art Unit: 2822

the conflicting claims are not identical, they are not patentably distinct from each other because this present application and the Patent are drawn to the same invention, wherein the height of the viscous material of U.S. Patent No. 6,040,205 is inherently controlled due to the buoyant stop and the coating stencil (re base claim 1), wherein the viscous material is inherently and controllly extruding through the coating stencil (re base claim 48). It would have been also obvious to one of ordinary skill in the art to determine the immersing time, use available viscous materials, and sizing shapes of the stencil opening, etc., for the best results.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).
